- The Telephony Co ensures users enjoy convenient access to a range of advanced features, such as inbound and outbound dialing, call forwarding, IVR system, auto attendants, and many other capabilities.
- Users can easily access various advanced features like inbound and outbound dialing, call forwarding, IVR system, auto attendants, and more.
- It enables the implementation of Least Cost Routing.
- Easy integration with CRM and Payment Gateway is supported by it.

The screenshot displays a PBX software interface. At the top, a blue header bar indicates 'Live Calls : 3'. Below this is a table with columns for 'Call Type', 'Caller', 'Callee', 'Forward', and 'Start Time'. The table contains three rows of call data. Below the table, a status bar shows 'Registered Extension : 6', 'Deregistered Extension : 49', and 'DND Extension : 0'. At the bottom, there is a grid of extension icons, each with a number from 101 to 130. The icons are color-coded: red for deregistered, blue for registered, and green for DND.

	Call Type	Caller	Callee	Forward	Start Time
	OUTBOUND	104	3453457676	3453457676	2021-11-23 16:33:21
	LOCAL	106	3001		2021-11-23 16:39:07
	OUTBOUND	107	9876598765	9876598765	2021-11-23 16:39:14

Registered Extension : 6 Deregistered Extension : 49 DND Extension : 0

101 102 103 104 105 106 107 108 109 110
121 122 123 124 125 126 127 128 129 130

Highlights Features of PBX Software
