## How much does IVF treatment cost in Jaipur?

IVF cost in Jaipur, Rajasthan, ranges from INR 1,75,000 to INR 2,10,000 for one IVF attempt. IVF is a fertility procedure where qualified professionals retrieve the intended parents' eggs and sperm to aid fertilization. Once fertilization occurs, the embryo specialist implants the created embryo into the mother's uterus and waits for pregnancy symptoms.

The expert asks the couple to visit an IVF clinic for a pregnancy test two weeks after the embryo transfer. If the embryo transfer is positive, the pregnancy will grow naturally at the gynecological clinic. However, if a couple fails to achieve a successful result in one attempt, they can repeat their IVF procedure or choose other advanced fertility procedures to have a child. To proceed with advanced fertility procedures, a couple should speak with their fertility specialist regarding procedure details, cost, duration, etc.

# What advanced fertility options are available at World Fertility Services, and how much do they cost in Jaipur?

*Below are the advanced fertility procedures available at World Fertility Services with their costs:*

1. IVF with ICSI
2. Egg Donor IVF
3. IVF with sperm donor
4. IVF with PGD
5. IVF with FET (Frozen Embryo Transfer)

## What is the success rate of standard and advanced IVF in Jaipur?

The success rate of standard IVF in Jaipur is relatively high compared to other developed countries. The success rate of standard IVF varies from 30 to 50% depending on the couple's age, body weight, lifestyle, IVF procedure, etc. In comparison, the success rate of advanced IVF varies from 50 to 90% depending on the method. World Fertility Services is the best IVF center in Jaipur, and it has highly qualified and trained fertility experts to facilitate pregnancy for couples of increasing ages. The specialists of this clinic use the latest and advanced technologies to treat routine and complex cases of infertility. We recommend that couples first speak to their fertility specialist to discuss which IVF procedure is correct for them to have a baby.
